

# Build Something Real: The Serverpod Hackathon (the "Hackathon")

## Official Rules

NO PURCHASE OR PAYMENT NECESSARY TO ENTER OR WIN. A PURCHASE OR PAYMENT WILL NOT INCREASE YOUR CHANCES OF WINNING.

SUBMISSION OF ANY ENTRY CONSTITUTES AGREEMENT TO THESE OFFICIAL RULES AS A CONTRACT BETWEEN ENTRANT (AND EACH INDIVIDUAL MEMBER OF ENTRANT), THE HACKATHON SPONSOR, AND BUILDERBASE LABS AB.

The Hackathon is a competition of skill. Prizes are awarded on merit against the criteria in section 6. No element of the Hackathon is determined by chance, and nothing in these Official Rules is intended to constitute a lottery or other arrangement regulated under the Swedish Gambling Act (spellagen 2018:1138) or equivalent applicable legislation.

---

### 1. Dates and Timing

All times are Central European Summer Time (CEST).

| Period                     | Dates                                                                                                          |
|----------------------------|----------------------------------------------------------------------------------------------------------------|
| Registration Period        | 15 September 2026 (17:30) to 14 October 2026 (23:59). Registration stays open for the whole Submission Period. |
| Submission Period          | 15 September 2026 (17:30) to 14 October 2026 (23:59). No extensions.                                           |
| Feedback Period            | 15 September 2026 (17:30) to 14 October 2026 (23:59)                                                           |
| Best Hackathon Post Period | 15 September 2026 (17:30) to 14 October 2026 (23:59)                                                           |
| Judging Period             | 15 October 2026 (09:00) to 20 October 2026 (17:00)                                                             |
| Winners Announced          | 22 October 2026 (18:00), at the Full Stack Flutter conference                                                  |

Optional check-ins run during the Submission Period. Participation is encouraged but is not a condition of eligibility for any Prize.

### 2. Sponsor and Administrator

Sponsor: Serverpod AB, Sjöbjörnsvägen 46, 117 67 Stockholm, Sweden (the "Sponsor").

Administrator: BuilderBase Labs AB, Markvardsgatan 10, 113 53 Stockholm, Sweden, company registration number 559568-9216, VAT number SE559568921601 (the "Administrator" or "BuilderBase"). The Administrator operates the platform on which the Hackathon runs, administers entry, judging and the delivery of Prizes, and acts as paying agent for cash Prizes on the Sponsor's behalf.

The Administrator is not the Sponsor and does not fund the Prizes.

All questions about the Hackathon, these Official Rules, eligibility and Prizes: [nate@builderbase.com](mailto:nate@builderbase.com).

### 3. Eligibility

### **The Hackathon IS open to:**

- Individuals who are at least the age of majority where they reside as of the time of entry ("Eligible Individuals");
- Teams of Eligible Individuals ("Teams"); and
- Organizations (including corporations, not-for-profit corporations and other nonprofit organizations, limited liability companies, partnerships, and other legal entities) that exist and have been organized or incorporated at the time of entry,

(collectively, "Entrants").

An Eligible Individual may join more than one Team or Organization, and an Eligible Individual who is part of a Team or Organization may also enter on an individual basis. If a Team or Organization is entering, they must appoint and authorize one individual (the "Representative") to represent, act, and enter a Submission on their behalf. By entering a Submission on behalf of a Team or Organization you represent and warrant that you are the Representative authorized to act on its behalf.

A Team may have a maximum of four (4) members.

### **The Hackathon IS NOT open to:**

- Individuals who are residents of, or Organizations domiciled in, a country, state, province or territory where the laws of Sweden, the European Union, the United States or local law prohibit participating in or receiving a prize in the Hackathon. This includes, but is not limited to, Brazil, Quebec, Russia, Belarus, Crimea and the non-government-controlled areas of Ukraine, Cuba, Iran, North Korea and Syria, together with any other territory designated under EU restrictive measures or by the United States Treasury's Office of Foreign Assets Control;
- Organizations involved with the design, production, paid promotion, execution, or distribution of the Hackathon, including the Sponsor and the Administrator ("Promotion Entities");
- Employees, representatives and agents\*\* of such Promotion Entities, and all members of their immediate family or household\*;
- Any other individual involved with the design, production, promotion, execution, or distribution of the Hackathon, and each member of their immediate family or household\*;
- Any Judge (defined below), or company or individual that employs a Judge;
- Any parent company, subsidiary, or other affiliate\*\*\* of any organization described above;
- Any other individual or organization whose participation would create, in the sole discretion of the Sponsor and/or Administrator, a real or apparent conflict of interest.

\* The members of an individual's immediate family include the individual's spouse, children and stepchildren, parents and stepparents, and siblings and stepsiblings. The members of an individual's household include any other person that shares the same residence as the individual for at least three (3) months out of the year.

\*\* Agents include individuals or organizations that, in creating a Submission, are acting on behalf of and at the direction of a Promotion Entity through a contractual or similar relationship.

\*\*\* An affiliate is: (a) an organization under common control, sharing a common majority or controlling owner, or common management; or (b) an organization that has a substantial ownership in, or is substantially owned by, the other organization.

## **4. How To Enter**

Entrants may enter by visiting

<https://builderbase.dev/event/build-something-real-the-serverpod-hackathon> (the "Hackathon Website")

and following the steps below:

- Register for the Hackathon on the Hackathon Website. To complete registration, create a free BuilderBase account or log in with an existing BuilderBase account. This enables you to receive important updates and to create your Submission.
- Complete the required registration questions, which include: (i) what best describes your current role; and (ii) what you currently use for your app backends.
- Obtain access to the required developer tools and platform and complete a Project as described under Project Requirements below. Use of the developer tools is subject to the licence agreement relating to them.
- Complete and enter all of the required fields on the submission page of the Hackathon Website (each a "Submission") during the Submission Period, following the Submission Requirements below.
- To be considered for the Most Valuable Feedback prize, Entrants must be registered for the Hackathon on the Hackathon Website, submit an eligible Submission, and complete the feedback form (each a "Feedback Submission") during the Feedback Period. To be eligible, a Feedback Submission must be complete and contain actionable comments that Serverpod can use to improve the Serverpod SDKs, App Studio or related documentation, for example bug reports, user interface improvements, or suggested integrations. One Feedback Submission per Entrant.

Entry in the Hackathon constitutes acknowledgement that the Sponsor and the Administrator will process an Entrant's personal data for the purpose of operating, judging and publicising the Hackathon, as described in section 15.

## Project Requirements

**What to Create:** Entrants must build a full-stack application in which Serverpod is the backend (each a "Project"). There are no tracks. The Project may be practical, playful or experimental, but it must be a working full-stack app built on the Serverpod stack.

**Functionality:** The Project must be capable of being successfully installed and run consistently on the platform for which it is intended, and must function as depicted in the video and described in the text description.

**Platforms:** A submitted Project must run on the platform for which it is intended and which is specified in the Submission Requirements.

**New Projects Only:** Projects must be newly created by the Entrant during the Submission Period.

**Third Party Integrations:** If a Project integrates any third-party SDK, API or data, the Entrant must be authorized to use it in accordance with the applicable terms and licensing requirements.

**AI and agentic tools:** Use of AI coding assistants and agentic tooling is expressly permitted and encouraged. Entrants must comply with the licence terms of any AI tool, model or component incorporated in a Project, and must disclose their use in the text description.

## Submission Requirements

Submissions must meet the following requirements:

- Include a Project built with the required developer tools that meets the Project Requirements above.
- Provide a URL to a code repository for judging and testing. The repository must contain all source code, assets and instructions required for the Project to be functional. Where the Hackathon

Website creates a private repository under Serverpod's GitHub organisation on the Entrant's behalf, that repository satisfies this requirement. Where an Entrant supplies its own private repository, the Entrant must share it with [viktor@serverpod.dev](mailto:viktor@serverpod.dev), [alexander@serverpod.dev](mailto:alexander@serverpod.dev) and [isak@serverpod.dev](mailto:isak@serverpod.dev).

- Include a text description explaining the features and functionality of the Project and how it was built.
- Include instructions for how to build and run the application.
- Include a demonstration video of the Project. The video: should be less than two (2) minutes, and Judges are not required to watch beyond two minutes; should show the Project functioning on the device for which it was built; must be uploaded to and made publicly visible on YouTube or Vimeo, with a link provided on the submission form; and must not include third-party trade marks, or copyrighted music or other material, unless the Entrant has permission to use it.

The demonstration video and the text description are mandatory and are the primary material the Judges rely on. Presentation quality is not scored separately under the Judging Criteria in section 6, so Entrants should spend their time on the Project rather than on video production.

### **Multiple Submissions**

An Entrant may submit more than one Submission, however each Submission must be unique and substantially different from each of that Entrant's other Submissions, as determined by the Sponsor and the Administrator in their sole discretion.

### **Testing**

Access must be provided to a working Project for judging and testing, by providing a link to a website, a functioning demo, or a test build. If the Entrant's website is private, the Entrant must include login credentials in its testing instructions. The Entrant must make the Project available free of charge and without restriction for testing, evaluation and use by the Sponsor, the Administrator and the Judges until the Judging Period ends. Judges are not required to test the Project and may judge on the basis of the text description, images and video alone.

### **Language Requirements**

All Submission materials must be in English or, if not in English, the Entrant must provide an English translation of the demonstration video, text description, testing instructions and all other materials submitted.

### **Team Representation**

If a Team or Organization is entering, they must appoint and authorize one Representative to represent, act and enter a Submission on their behalf. The Representative must meet the eligibility requirements above. By entering a Submission on behalf of a Team or Organization you represent and warrant that you are the Representative authorized to act on its behalf.

### **Intellectual Property in Submissions**

Your Submission must: (a) be your (or your Team's or Organization's) original work product; (b) be solely owned by you, your Team or your Organization, with no other person or entity having any right or interest in it; and (c) not violate the intellectual property rights or other rights, including copyright, trade mark, patent, contract and privacy rights, of any other person or entity. An Entrant may contract with a third party for technical assistance provided the Submission components are solely the Entrant's work product and the result of the Entrant's own ideas and creativity, and the Entrant owns all rights to them.

An Entrant may submit a Submission that includes open-source software or hardware, provided the Entrant complies with the applicable open-source licences and, as part of the Submission, creates software that enhances and builds upon the features and functionality of the underlying open-source product. By entering, you represent, warrant and agree that your Submission meets these requirements.

### **Financial or Preferential Support**

A Project must not have been developed, or derived from a Project developed, with financial or preferential support from the Sponsor or the Administrator. Such Projects include those that received funding or investment for their development, were developed under contract, or received a commercial licence from the Sponsor or the Administrator at any time prior to the end of the Submission Period. The Sponsor may, at its sole discretion, disqualify a Project if awarding a Prize to it would create a real or apparent conflict of interest.

## **5. Submission Modifications**

**Draft Submissions.** Prior to the end of the Submission Period you may save draft versions of your Submission in your BuilderBase account before submitting the Submission materials for evaluation. Once the Submission Period has ended you may not make any changes or alterations to your Submission, but you may continue to develop the Project in your own repository.

**Modifications after the Submission Period.** The Sponsor and the Administrator may permit you to modify part of your Submission after the Submission Period for the purpose of adding, removing or replacing material that potentially infringes a third-party mark or right, discloses personal data, or is otherwise inappropriate. The modified Submission must remain substantively the same as the original, with the only modification being what the Sponsor and the Administrator permit.

## **6. Judges and Criteria**

Eligible Submissions will be evaluated by a panel of judges selected by the Sponsor (the "Judges"). Judges may be employees of the Sponsor or third parties, may or may not be listed individually on the Hackathon Website, and may change before or during the Judging Period. Judging may take place in one or more rounds with one or more panels of Judges, at the discretion of the Sponsor.

### **Stage One: eligibility screening**

The first stage determines, on a pass or fail basis, whether a Submission meets a baseline level of viability, namely that the Project reasonably fits the theme and makes reasonable use of the Serverpod stack.

**Automated assistance.** The Administrator uses automated, AI-assisted tooling in Stage One to check that a Submission is complete, to verify that the required elements are present, and to produce a written summary of the Project for the Judges. Every Submission that is not clearly incomplete is reviewed by a person before it is failed at Stage One. Automated tooling does not score Submissions and does not select winners. All Prize decisions are made by the human Judges.

### **Stage Two: scored judging**

All Submissions that pass Stage One are scored by the Judges against the following weighted criteria (the "Judging Criteria"):

| Criterion                      | Weight | What the Judges are looking for                             |
|--------------------------------|--------|-------------------------------------------------------------|
| Does it work                   | 30%    | It runs, the core flow completes, nothing critical is faked |
| Use of the Serverpod stack     | 25%    | Doing real work, not sitting behind a static page           |
| Craft and technical creativity | 25%    | Rough is fine, careless is not                              |
| Usefulness                     | 20%    | A clear user with a clear problem, and this helps           |

The scores from the Judges determine the potential winners of the applicable Prizes. The Entrants eligible for a Prize whose Submissions earn the highest overall scores under the Judging Criteria become the potential winners of that Prize.

### Best Hackathon Post

The Best Hackathon Post Prize is selected by the Sponsor, at its sole discretion, from public posts made about the Hackathon or about an Entrant's Project. It is not decided by a vote and is not scored under the Judging Criteria.

To be eligible, a post must be published publicly during the Best Hackathon Post Period by an Entrant who is registered for the Hackathon, must clearly identify the Hackathon, and must comply with the Code of Conduct in section 16 and with the terms of the platform on which it is published. The Sponsor looks for posts that show real work in progress or a finished Project and that are genuinely useful or interesting to other developers. An Entrant may publish more than one post, and only the Entrant's best post is considered.

The Sponsor may decline to award this Prize if, in its judgement, no post merits it. The Sponsor's decision is final.

### Tie breaking

If two or more Submissions are tied for a Prize, the tied Submission with the higher score on "Does it work" is treated as the higher scoring Submission. If a tie remains, the process is repeated against each remaining Judging Criterion in the order listed above. If two or more Submissions remain tied on all criteria, the panel of Judges will vote on the tied Submissions. No tie is resolved by chance.

## 7. Intellectual Property Rights

**All Submissions remain the intellectual property of the individuals or organizations that developed them. Entrants retain full ownership of their Projects and their code.**

By submitting an entry, Entrants grant the Sponsor and the Administrator a fully paid, non-exclusive, worldwide, royalty-free, non-transferable licence to use, reproduce, display and communicate the Submission for the purposes of judging the Submission, administering the Hackathon, and promoting and reporting on the Hackathon and its results. This licence continues for twelve (12) months following the end of the Submission Period.

Neither the Sponsor nor the Administrator acquires any ownership of, or any right to commercialise, a Submission under these Official Rules, and neither is obliged to use any Submission.

Repositories. Where a private repository is created under Serverpod's GitHub organisation on an Entrant's behalf, it is created solely to enable judging and testing. Hosting a repository in that organisation does not transfer any ownership of the code in it. Repositories will be archived at the end of

the Judging Period, and an Entrant may request that its repository be transferred to it or deleted at any time after the Judging Period ends.

Some Submission components may be displayed to the public. Other Submission materials may be viewed by the Sponsor, the Administrator and the Judges for screening and evaluation.

By submitting an entry or accepting any Prize, Entrants represent and warrant that (a) submitted content is not copyrighted, protected by trade secret or otherwise subject to third-party intellectual property rights or other proprietary rights, including privacy and publicity rights, unless the Entrant is the owner of those rights or has permission from their rightful owner; and (b) the content submitted does not contain any virus, Trojan horse, worm, spyware or other disabling device or harmful or malicious code.

Use of an Entrant's name, likeness, voice or image is governed by section 10.

## 8. Prizes

All amounts are in USD and per team - not per individual in a team. Credits are credits on Serverpod Cloud.

| Award                  | Prize                                       | Qty      | Eligible Submissions                        |
|------------------------|---------------------------------------------|----------|---------------------------------------------|
| 1st place              | \$5,000 cash + \$2,500 in Credits           | 1        | All eligible Submissions                    |
| 2nd place              | \$3,000 cash + \$2,000 in Credits           | 1        | All eligible Submissions                    |
| 3rd place              | \$1,000 cash + \$1,500 in Credits           | 1        | All eligible Submissions                    |
| 4th place              | \$500 cash + \$1,500 in Credits             | 1        | All eligible Submissions                    |
| 5th place              | \$1,500 in Credits                          | 1        | All eligible Submissions                    |
| Most Valuable Feedback | \$500 cash + \$500 in Credits               | 1        | All eligible Feedback Submissions           |
| Best Hackathon Post    | \$500 in Credits                            | 1        | All eligible posts, selected by the Sponsor |
| <b>*Total</b>          | <b>*\$10,000 cash + \$10,000 in Credits</b> | <b>7</b> |                                             |

### Multiple prize eligibility

- A Project can win only one (1) overall Prize. Winning an overall Prize does not prevent the same Entrant from winning the Best Hackathon Post Prize.
- Each individual Entrant that has registered and submitted an eligible Submission is eligible for one (1) Most Valuable Feedback Prize. Eligible individuals who submit only a Feedback Submission are not eligible for any other Prize. Feedback Prizes are awarded to individuals, not to Projects, and are not displayed on the Hackathon Website.
- If there are no eligible Submissions for a Prize, that Prize will not be awarded.

### Substitutions and changes

Prizes are non-transferable by the winner. The Sponsor has the right, in its sole discretion, to substitute a Prize of equivalent or greater value. The Sponsor will not award a Prize if there are no eligible Submissions, or no eligible Entrants or Submissions for a specific Prize.

## Verification requirement

THE AWARD OF A PRIZE TO A POTENTIAL WINNER IS SUBJECT TO VERIFICATION OF THE IDENTITY, QUALIFICATIONS AND ROLE OF THE POTENTIAL WINNER IN THE CREATION OF THE SUBMISSION. No Submission or Entrant is a winning Submission or winner until the required post-competition declarations have been completed and verified, even if prospective winners have been announced verbally or on the Hackathon Website. The final decision to designate a winner is made by the Sponsor and the Administrator.

## Prize delivery

Prizes are payable to the Entrant if an individual, to the Entrant's Representative if a Team, or to the Organization if the Entrant is an Organization. It is the responsibility of the winning Entrant's Representative to allocate the Prize among their Team's or Organization's participating members as the Representative deems appropriate. Neither the Sponsor nor the Administrator has any responsibility for how a Prize is shared among Team or Organization members.

Cash Prizes are paid by the Administrator, acting as paying agent for the Sponsor, by bank transfer to the Entrant, the Entrant's Representative or the Organization, only after receipt of the completed winner declaration and any other required forms (collectively the "Required Forms"). The deadline for returning the Required Forms to the Administrator is ten (10) business days after they are sent. Failure to provide correct information on the Required Forms, or other correct information required for delivery of a Prize, may result in delayed Prize delivery, disqualification of the Entrant, or forfeiture of a Prize. Prizes will be delivered within thirty (30) days of the Administrator's receipt of the completed Required Forms.

All Serverpod Cloud credits distributed as Prizes are non-transferable and remain valid for one (1) year from the date of distribution.

## Fees and taxes

Winners, and in the case of a Team or Organization all participating members, are responsible for any fees associated with receiving or using a Prize, including bank transfer fees and currency exchange fees. Winners are responsible for reporting and paying all applicable taxes in their jurisdiction of residence. Winners may be required to provide information to facilitate receipt of the award, including confirmation of identity and tax residency and any documentation necessary for compliance with applicable withholding and reporting requirements. Winners are also responsible for complying with foreign exchange and banking regulations in their respective jurisdictions and for reporting receipt of the Prize to the relevant authorities where necessary. The Sponsor and the Administrator reserve the right to withhold a portion of a cash Prize where required to comply with the tax laws of Sweden or of a winner's jurisdiction, and to decline to pay a Prize where payment would breach applicable sanctions or anti-money-laundering law.

## 9. Entry Conditions and Release

By entering the Hackathon, you, and if you are entering on behalf of a Team or Organization each participating member, agree to the following:

- The relationship between you and the Sponsor and the Administrator is not a confidential, fiduciary or other special relationship.
- You will be bound by and comply with these Official Rules and the decisions of the Sponsor, the Administrator and the Judges, which are binding and final in all matters relating to the Hackathon.
- You release, indemnify, defend and hold harmless the Promotion Entities and their respective parent, subsidiary and affiliated companies, the Prize suppliers, and any other organizations responsible for sponsoring, fulfilling, administering, advertising or promoting the Hackathon, together

with all of their respective past and present officers, directors, employees, agents and representatives (the "Released Parties"), from and against any and all claims, expenses and liabilities, including reasonable legal fees, arising out of or relating to your entry, the creation or entry of a Submission, participation in the Hackathon, acceptance, use or misuse of a Prize, and the broadcast, transmission, performance, exploitation or use of the Submission as authorized or licensed by these Official Rules.

Without limiting the foregoing, the Released Parties have no liability in connection with:

- any incorrect or inaccurate information, whether caused by the Sponsor's or the Administrator's electronic or printing error, or by any equipment or programming associated with or used in the Hackathon;
- technical failures of any kind, including malfunctions, interruptions or disconnections in internet connectivity, electronic transmission errors, or failure of network hardware or software or of the Hackathon Website;
- unauthorized human intervention in any part of the entry process or the Hackathon;
- technical or human error in the administration of the Hackathon or the processing of Submissions; or
- any injury or damage to persons or property caused, directly or indirectly, in whole or in part, by an Entrant's participation in the Hackathon or receipt, use or misuse of any Prize.

The Released Parties are not responsible for incomplete, late, misdirected, damaged, lost, illegible or incomprehensible Submissions, or for changes to an Entrant's address or email address. Proof of sending or submitting is not proof of receipt by the Sponsor or the Administrator. If for any reason an Entrant's Submission is determined not to have been received, or to have been erroneously deleted, lost, destroyed or corrupted, the Entrant's sole remedy is to request the opportunity to resubmit. Such a request must be made promptly after the Entrant knows or should have known there was a problem, and will be determined at the sole discretion of the Sponsor.

Nothing in this section limits or excludes any liability that cannot lawfully be limited or excluded, including liability for death or personal injury caused by negligence, for fraud, or for gross negligence or intentional acts.

## **10. Publicity and Use of Your Name**

Announcing and reporting the results. By participating, each Entrant acknowledges that the Sponsor and the Administrator will announce and publish the results of the Hackathon, and that this will include the Entrant's name or Team name, project title and submission summary, and, for winners and placed or shortlisted Entrants, the demonstration video. The Sponsor and the Administrator may publish this information on their websites, event pages, social media channels, and in press and event materials, for the purposes of announcing, documenting and reporting on the Hackathon. Each of the Sponsor and the Administrator relies on its own legitimate interests in publicising and reporting on the Hackathon as the basis for this processing. This is separate from, and does not require, consent. An Entrant may object to this use at any time by contacting [nate@builderbase.com](mailto:nate@builderbase.com), and may withdraw from publicity on reasonable grounds, in which case the Sponsor and the Administrator will cease further such use save for material already published or in production.

Marketing use. Any use of an Entrant's name, image, likeness, voice or statements for marketing, advertising or promotional purposes, as distinct from announcing, documenting and reporting on the Hackathon, is not covered by the paragraph above. It will be carried out only where the Entrant has

given a separate, specific and optional consent at registration or under a separate media consent and release. Acceptance of these Official Rules is not, and does not constitute, that consent. Consent may be withdrawn at any time.

Mailing list. Any subscription to Serverpod or BuilderBase marketing communications is a separate, optional opt-in at registration. It is not selected by default and is not a condition of entry.

## 11. General Conditions

- The Sponsor and the Administrator reserve the right, in their sole discretion, to cancel, suspend or modify the Hackathon, or any part of it, in the event of a technical failure, fraud, or any other factor or event that was not anticipated or is not within their control.
- The Sponsor and the Administrator reserve the right, in their sole discretion, to disqualify any individual or Entrant that they find to be tampering, or presenting the appearance of tampering, with the entry process or the operation of the Hackathon, or to be acting in violation of these Official Rules, the Code of Conduct, or in a manner that is inappropriate, not in the best interests of the Hackathon, or in violation of any applicable law or regulation.
- Any attempt by any person to undermine the proper conduct of the Hackathon may be a violation of criminal and civil law. Should the Sponsor or the Administrator suspect that such an attempt has been made or is threatened, they reserve the right to take appropriate action, including requiring an Entrant to cooperate with an investigation and referral to law enforcement authorities.
- If there is any discrepancy or inconsistency between these Official Rules and disclosures or other statements contained in any Hackathon materials, including the submission form, the Hackathon Website, or advertising, these Official Rules prevail.
- These Official Rules are subject to change at any time, including the rights or obligations of the Entrant, the Sponsor and the Administrator. The amended Official Rules will be posted on the Hackathon Website. To the fullest extent permitted by law, any amendment becomes effective at the time specified in the posting of the amended Official Rules or, if no time is specified, at the time of posting. The Sponsor and the Administrator will take reasonable steps to notify registered Entrants of any material change.
- If at any time prior to the submission deadline an Entrant or prospective Entrant believes that any term in these Official Rules is or may be ambiguous, they must submit a written request for clarification to [nate@builderbase.com](mailto:nate@builderbase.com).
- The Sponsor's or the Administrator's failure to enforce any term of these Official Rules does not constitute a waiver of that provision. Should any provision be or become illegal or unenforceable in any jurisdiction whose laws may apply to an Entrant, that illegality or unenforceability leaves the remainder of these Official Rules unaffected and valid to the fullest extent permitted by law, and the affected provision will be replaced by a valid and enforceable provision that comes closest to reflecting the Sponsor's intention.
- Excluding Submissions, all intellectual property related to this Hackathon, including copyrighted material, trade marks, trade names, logos, designs, promotional materials, web pages, source code, drawings, illustrations, slogans and representations, is owned or used under licence by the Sponsor or the Administrator. All rights are reserved. Unauthorized copying or use of any copyrighted material or intellectual property without the express written consent of its owner is prohibited. Any use in a Submission of the Sponsor's or the Administrator's intellectual property is permitted solely to the extent provided for in these Official Rules.

## 12. Limitations of Liability

By entering, all Entrants, including in the case of a Team or Organization all participating members, agree to release the Released Parties from all liability in connection with the Prizes or the Entrant's participation in the Hackathon, save that no limitation of liability applies in respect of gross negligence or intentional acts, or death or personal injury, or any other liability that cannot lawfully be limited or excluded.

Subject to the paragraph above, the total aggregate liability of the Sponsor and of the Administrator to any Entrant arising out of or in connection with the Hackathon, whether in contract, tort including negligence, or otherwise, shall not exceed the value of the Prize for which that Entrant was eligible.

Subject to the first paragraph of this section, neither the Sponsor nor the Administrator is liable for any indirect or consequential loss, or for any loss of profit, revenue, data or goodwill.

## 13. Governing Law and Disputes

These Official Rules, and any dispute or claim arising out of or in connection with them, the Hackathon or any Prize awarded, are governed by the substantive laws of Sweden, without regard to its conflict of law rules.

The parties submit to the exclusive jurisdiction of the courts of Sweden, with the Stockholm District Court (Stockholms tingsrätt) as the court of first instance.

Nothing in this section deprives a consumer of the protection of any mandatory provision of the law of the country in which that consumer is habitually resident, or of the right to bring proceedings in the courts of that country where applicable law so provides.

## 14. Additional Terms

Please review the BuilderBase Terms and Conditions at <https://builderbase.dev/terms> for additional rules that apply to your participation in the Hackathon and, more generally, to your use of the Hackathon Website. Those terms are incorporated by reference into these Official Rules. If there is a conflict between the BuilderBase Terms and Conditions and these Official Rules, these Official Rules prevail with respect to this Hackathon only.

Use of the Serverpod SDKs, App Studio and Serverpod Cloud is additionally subject to the licence and service terms applicable to them.

## 15. Entrant's Personal Information

Serverpod AB is the controller of personal data processed for the purposes of administering and judging the Hackathon and awarding the Prizes. BuilderBase Labs AB is the controller of personal data processed for the purposes of operating the Hackathon Website and an Entrant's BuilderBase account. Each acts as controller in respect of its own purposes and determines the means of its own processing.

Personal data is processed in accordance with Regulation (EU) 2016/679 (the General Data Protection Regulation) and applicable Swedish data protection law, for the purposes of administering the Hackathon, verifying eligibility, judging Submissions, awarding and paying Prizes, and announcing and reporting the results as described in section 10.

Further information, including the legal bases relied on, retention periods, international transfers, and how to exercise your rights of access, rectification, erasure, restriction, objection and portability, is set out in the BuilderBase privacy notice at <https://builderbase.dev/privacy>, which is linked from the Hackathon Website. Where Serverpod publishes its own privacy notice, that notice applies in addition in respect of Serverpod's processing.

Questions or requests relating to your personal data: [nate@builderbase.com](mailto:nate@builderbase.com).

## 16. Code of Conduct

All Entrants, Judges, mentors and other participants must comply with the Hackathon Code of Conduct, which applies to the Hackathon Website, the Hackathon Discord server, and all other Hackathon-related channels and communications.

The following behaviour is not tolerated: harassment, intimidation, bullying or discrimination based on age, disability, gender reassignment, sex, gender identity or expression, sexual orientation, marital or civil partnership status, pregnancy or maternity, race, colour, ethnic or national origin, nationality, religion or belief, or any other characteristic protected under applicable law; unwelcome sexual attention, sexual comments or imagery, and any other form of sexual harassment; verbal or written abuse, threats, or violent language; deliberate intimidation or stalking, including online; sustained disruption of judging, presentations or community channels; harassment of Judges, mentors or organisers, including attempts to influence judging outside the process set out in these Official Rules; and retaliation against any person who reports a concern.

Reports may be made to [nate@builderbase.com](mailto:nate@builderbase.com). All reports will be treated seriously and handled with discretion, and information will be shared only with those who need to know in order to address the concern or to comply with a legal obligation.

The Sponsor and the Administrator may take any action they reasonably consider appropriate in response to a breach, including a warning, removal from the Hackathon Website and community channels, disqualification from the Hackathon, withdrawal of eligibility for any Prize, and referral to the relevant authorities.
